

CIGRE 2010

Event Details

Date: 22-27 August 2010

Venue: Palais Des Congres, Paris, France

Booth No: 79

CIGRE (International Council on Large Electric Systems) is one of the leading worldwide Organizations on Electric Power Systems, covering the technical, economic, environmental, organizational and regulatory aspects. The CIGRE session goes back by over 80 years and helps bring together the electrical engineers from across the world. The high quality of papers presented and the topical interests of the subjects discussed are in direct relation to the power industry.

The CIGRE Technical Exhibition, a biennial event that happens alongside the conference session, was started in 1994 and has gradually become a must attend for everyone in the power industry.

CIGRE 2010 saw around 4,000 delegates as attendees with over 100 exhibiting companies and industry professionals from different countries across the globe.

Kalkitech was represented by three of our delegates, VP, Sales & Marketing, Mr. Sreeni T S. who is also a registered conference attendee, Mr. Arun Nair and Mr. Shameem PV.

Kalkitech organized various product demonstrations and showcased the working of the products on the ground level. The products in focus were (i) protocol gateways, - especially higher end SYNC 3000, ICCP Gateways, etc, (ii) IEC 61850 based SCL Manager and (iii) SYNC OEMs.

We are thankful to all those who visited our booth and look forward working with you to create *"A Whole New World of Intelligent Energy Systems"*
